Elena Kononova (Developer Program)

Aug 11, 2025, 15:28 GMT+2

Dear Femi,

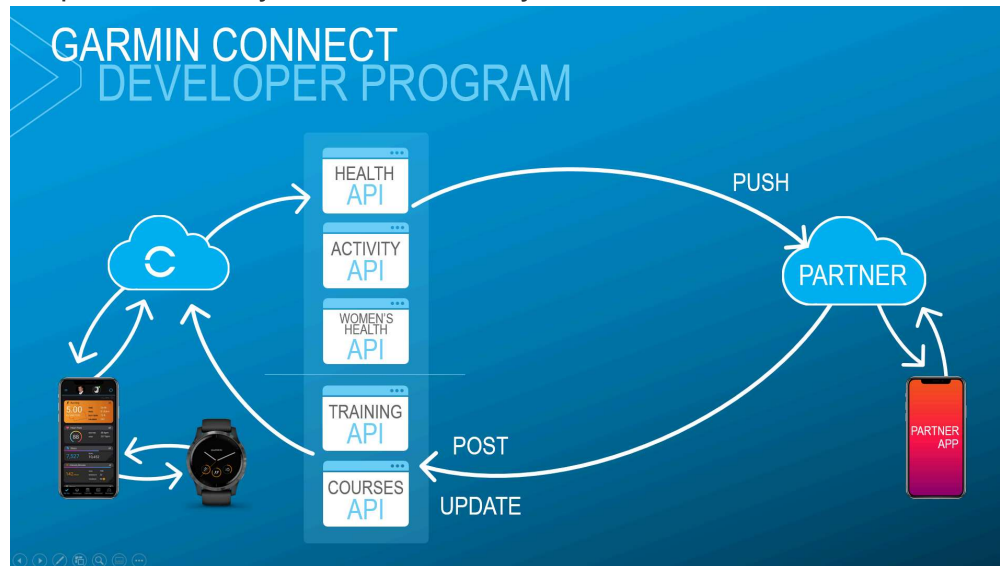

Thank you very much for taking the time to participate in our Integration Call just a few minutes ago.
I have put together a few of the slides and the most important findings for you.

1) The data flow is triggered by the synchronization behavior of the customer.

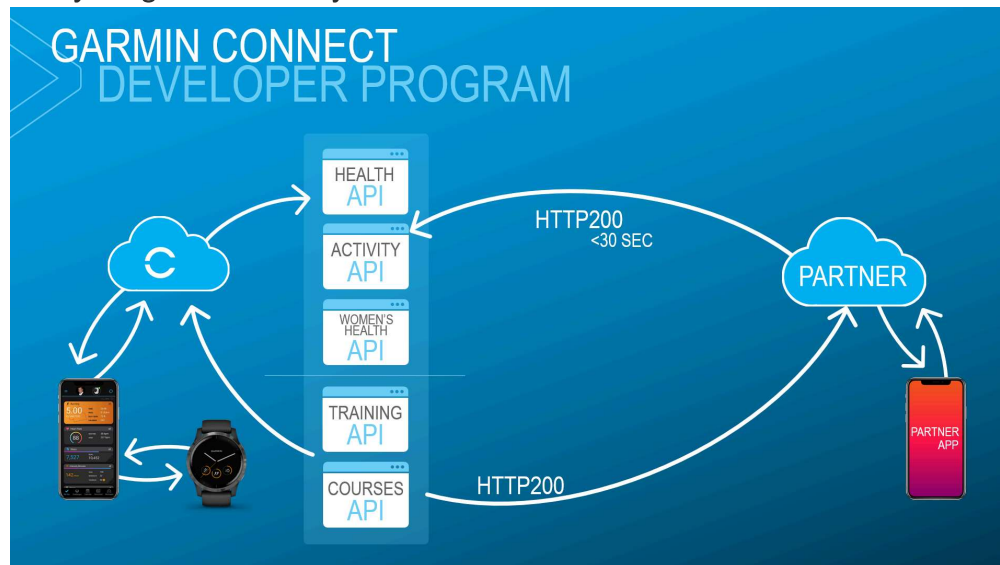

2) Every time the customer synchronizes his device to his Garmin Connect

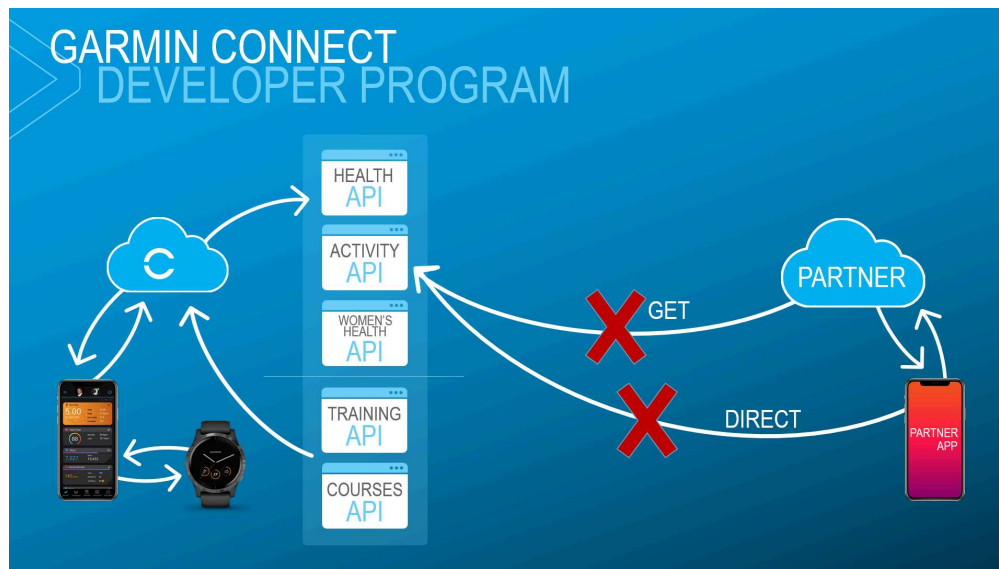

account,
we push the newly received data to your server.

3) Please respond asynchronously with HTTP200 within 30 Seconds to everything we send to you.

4) PULL-ONLY requests and direct Mobile App Connections are not permitted.

Please keep in mind that the Evaluation environment you have been given access to is restricted for sandbox use.

Any deviating use of this key such as onboarding end users or exposing it to public Git Hub, etc. will result in it being invalidated and/or deleted.

To move to the **Production Level** for commercial and use in studies, please find the requirements below.

The review process as such is initialized via [\[Partner Verification\]](#) as soon as you are ready.

General Production Level Requirements:

- Server-server communication only! (*No direct mobile phone API connection*),
- No Freemail accounts or non-company domain email accounts (*admin domain as reference*) set as admin/developer,
- If applicable, a copy of the NDA between your company and the subcontractor is provided
- Deregistration Endpoint enabled,
- User Permission Change Endpoint enabled,
- USER-ID processing implemented (See Chapter 3, Start Guide),
- At least two Garmin Connect accounts connected to your key in review,
- No mechanism is installed to make PULL-ONLY requests at all,

- At least one successful data transfer for every endpoint enabled,
 - HTTP 200 sent within 30 seconds to all data received,
 - Your file size limit is set to 100 MB minimum.
-
- PUSH Model: asynchronous HTTP200 sending installed
 - PING-PULL Model: the callback URL of every PING is used to PULL related data within 24 hours.

Training/Courses API Prod. Level Request

- Please provide a screenshot of at least one successfully sent training/course from your server to your Garmin Connect account.

2. UX and Brand Compliance Review:

To ensure the user experience and branding comply with Garmin's guidelines, submit screenshots and/or video demonstrating:

- All uses of Garmin trademarks, logos, and brand elements throughout the app
- All instances of Garmin products and imagery
- All required attribution statements, as specified in the API brand guidelines
- A complete view of the user experience (UX) flow, ensuring Garmin is accurately represented and not mischaracterized

Note: All instances where Garmin branding, marks, or attribution appear in the app must be included in the submission

During the production review, your company account will also be checked for any unsupported settings/invitations made during your development phase.

Best Regards / Freundliche Grüße / Cordialement

Microsoft Teams Conference Bridge

Dear Femi,

I am confirming the integration call to be scheduled for **Aug 11th @1 pm GMT**.

Please join the session by clicking the link to the right: [[Microsoft TEAMS](#)]

In preparation, please make sure everybody with access to data considered as "classified" (*specifications, internal tools, app credentials, and/or development code*)

has been added to the list of **verified persons** at developerportal.garmin.com.

To do so, please click on your company name and "members" after your first login [[Developer Portal](#)].

Please consider the following:

- Non-personalized/generic email addresses (*support@, info@, contact@, dev@, etc.*) are **restricted** from being added.
- Non-company domain accounts and any freemail accounts (*gmail, outlook, hotmail, etc.*) are restricted from being added.
- Third-party integrator accounts are only allowed after providing a copy of the NDA between them and you.
To do so, please respond to this ticket and attach the NDA.

If suspicious activity or a violation is discovered, your access to the Developer Program is at risk of being disabled.

Best Regards / Freundliche Grüße / Cordialement

Hi,

Apologies, can I move this meeting out to Monday, 11am GMT works for me.

Also, I wanted to clarify, would you like to see a prototype? I do have something, not sure its ready for prototyping though as I'm still building the core elements of the application but I can certainly walk you through requirements and potential design

Regards
